

ALL DAIRIES IN TERRITORY HAVE BEEN INSPECTED

Sanitary Survey Made; Report Shows Health Board to Have Spent \$417,942.84

Every dairy in the territory has been inspected and a sanitary survey made of it according to the annual report of the board of health, made to Governor Lucius E. Pinkham and signed by Dr. J. S. B. Pratt, president of the board.

"A complete sanitary inspection has been made of every dairy in the territory, for the use of the milk commission appointed by you on January 20, 1915," says part of the report.

Relative to physicians in the territory, the report adds that there are now 134 licensed doctors in the islands, of which 74 are American, 41 Japanese, 18 British, four German, four Chinese, one Portuguese and one Norwegian.

Relative to the board of health, for the year from July 1, 1915, to June 30, 1916, was \$37,837.46, while expenditures in the same period were \$417,942.84.

Dr. Pratt takes occasion to inform Governor Pinkham that the present condition of the Honolulu water supply is below the standard adopted by the U. S. public health service for water furnished by a common carrier in interstate traffic.

Attention of the Honolulu water works was called to the mixing of the Nuuanu Valley supply with the artesian supply in the business section below School street, due to leaky valves. After considerable delay new valves were installed on Nuuanu Valley supply, and at Fort and School, which should remedy the trouble. The chlorination plant for the Nuuanu supply has not worked satisfactorily at all times," adds the report.

Relative to physical defects reported among pupils of the public schools, the report states that in eye defects, 41 cases were reported in 1914-15, 42 in 1915-16, and 43 in 1916-17.

MILLS SCHOOL SECURES HOME OF W. A. KINNEY

Sale of the W. A. Kinney home at the Mid-Pacific Institute has been made by the Trust Trust Co. The three houses of beautiful terraces for the Mills school will be used for school purposes this coming year. There are two buildings of the grounds, also a swimming pool and tennis court.

The reported consideration \$250,000.

FEWER WEDDINGS IN ISLANDS THAN IN YEAR BEFORE

Bins, However, Are 100 Per Cent Above Deaths; Health of Territory Good

In Cupid was not so busy last year as previously and as a result there were 65 fewer marriages in Honolulu for the fiscal year ending June 30, the for the year before, and 14 less in the territory, says a portion of the annual report made by President J. S. Pratt of the territorial board of health to Governor Lucius E. Pinkham.

Marriages in the territory for the year were 2716. The largest number of weddings were performed in August and December, 1915, and the smallest in September and November, 1915, and May of this year.

Despite this decrease, the stork has been just twice as busy as the undertaker. The report shows that there were 100.48 per cent increase in the number of births above deaths. Births were 7829, while deaths totaled only 30. Births were 977 more than in the previous year.

An interesting item concerning this is that Japanese babies form nearly two-thirds of the total. There were 4629 births recorded at the Japanese consulate in the year. Deaths in the territory, 1916, were a more than for the fiscal year of 1915. Excluding deaths from external causes, of which there were 234, the territory, the death rate in the islands for the year was 15.38 per thousand.

In Honolulu 1321 deaths occurred, as more than for 1914-15, making the death rate 19.43 per thousand. Excluding deaths from external causes, the death rate in this city is 18.29 per thousand inhabitants.

The death rate from typhoid fever in Honolulu was lower than any year in record. It was only 20.6 per 100,000 inhabitants. There were 43 less cases of paratyphoid than in 1914-15.

With improvement in sanitary conditions in the coming year it is hoped for the total number of eye cases, as still further reduction," says the report. While an analysis of the mortality report, mortality, says, "Pratt's report in part, shows that there has been a slight increase of 1.20 in the mortality rate over the previous year, and on account of measles a considerable increase in mortality reported, yet on the whole the health of the territory has been good."

ACID STOMACHS ARE DANGEROUS

Nine-tenths of All Stomach Trouble Said to Be Due to Acidity.

A Physician's Advice on Cause and Cure.

A famous physician whose successful researches into the cause and cure of stomach and intestinal diseases have earned for him an international reputation, said in the course of a recent lecture that nearly all intestinal troubles, as well as many diseases of the vital organs, were directly traceable to a deranged condition of the stomach which in turn was due to acidity, or, in other words, to excessive acidity, commonly termed sour stomach or heartburn, which not only irritated and inflamed the delicate lining of the stomach, but also set up gastritis and stomach ulcers. It is interesting to note that he condemns the use of patent medicines as well as of medical treatment for the stomach, stating that he and his colleagues have secured remarkable results by the use of ordinary bisulphate of magnesia, which, by neutralizing the acidity of the food, removes the source of the trouble. He contends that it is as foolish to treat the stomach itself as it would be for a man who stepped on a tack to rub his foot on the tack without first removing the tack. Remove the tack and the foot will heal itself—neutralize the acid and stomach troubles will disappear. Irritating medicines and medical treatments are useless, so long as the contents of the stomach remain acid; remove the acidity, and there will be no need for medicine—the inflamed lining of the stomach will then heal itself. Sufferers from acidity, sour stomach or heartburn should get a small bottle of bisulphate of magnesia from their druggist, and take a teaspoonful in a quarter of a glass of hot or cold water after meals, repeating in fifteen minutes, if necessary, this being the dose which the doctor has found most efficacious in all cases. For sale by Benson, Smith & Co., Chambers Drug Co. and Hollis & Co.—Advertisement.

Miss Kathleen Bergstrom and Ernest K. Richardson were married Monday night by Rev. Samuel K. Kapiolani at the latter's residence for Elizabeth K. Ives and Arnold B. Richardson attended the bride and groom. Several intimate friends witnessed the ceremonies for the popular pair.

HIGHER LIVING COSTS HIGHER, MEAT PRICES UP

Advances Will Not Affect the Cheaper Cuts But Better Selections Rise

The price of wholesale beef has risen one cent today in Honolulu, out of prime retail cuts advanced 2 1/2 cents; but the rougher and cheaper cuts remain the same.

G. J. Waller, Jr., secretary of the Hawaii Meat Company, Ltd., says there is no particular reason for the rise, but it is understood that scarcity of beef due to drought and the absence of the Australian supply since the war are causes. The Hawaii company recently obtained the army contract here, which makes island beef dearer.

That all prime cuts of beef will go up 2 1/2 cents today was the announcement of Antoine Louis, proprietor of the Metropolitan Meat Market. He says this rise will be generally observed in all markets here, but

that prices of other meats will not be affected.

A. T. Longley, superintendent of the Territorial Marketing Division, had not heard of the new prices when questioned this morning about the division prices, but said the latter would quite likely correspond with prevailing prices in other markets.

Waller couldn't say whether there would be another advance. He pointed out, however, that poorer people will not be affected by the rise.

The sun and burning winds of the shore will ruin the hardest complexion. Protect your skin by using

Gouraud's Oriental Cream

If you are now troubled with sun or windburn, this cream will disappear at once. It beautifies the complexion instantly with a soft, cool, peachy white appearance. Try it at once.
